EXAMINERS AMENDMENT

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

The application has been amended as follows:

Changed the title to --Calibration Device for a Helical Spring Scale --

Reasons for Allowance

The following is an examiner's statement of reasons for allowance: the closest prior art, Yang US # 6,246,017) shows a scale as claimed with, *inter alia*, a calibration means consisting of a lower first pressing element (7) and an upper second pressing element (41), but the first pressing element is not "slidably secured" in the housing since it is screwed into the housing; in addition, the first pressing element and the adjusting unit are one and the same element and therefore cannot be rotated relative to each other. The reference to Strohmeier (US # 6,649,850) has no pressing elements *per se* since it seems to calibrate the spring by stretching it instead of compressing it; also, the

adjusting unit (13) is located at the top of the housing, not near the bottom where the carrying unit (20) is.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Randy W. Gibson whose telephone number is (571) 272-2103. The examiner can normally be reached on Mon-Fri., 9-5.
